Student Project - 2024/2025

Project Topic: Design and Implementation of a Smart Irrigation System Using IoT

Student Name(s): John K. Mensah, Ama A. Owusu

Programme: BSc Computer Science

Degree Level: BSc

Academic Year: 2024/2025

Supervisor: Dr. Kwame Asare

Abstract:

This project presents a low-cost IoT-based irrigation system that monitors soil moisture and automates water delivery. The system reduces water waste and improves crop yield through real-time sensing and mobile control.

Objective:

To design, implement and evaluate a smart irrigation prototype that integrates soil-moisture sensors, a microcontroller and a mobile dashboard.
